PENNIES NOW BUY DOLLAR VALUES

in the World's Finest *IRIS*

A FEW years ago, when I first imported the Iris Wm. R. Dykes, the original plants cost me about \$125 each, including duty and expense getting them over here.

Depute Nomblot recently sold at \$75 for a single plant. Mrs. Valery West sold when it was first introduced for \$65. Aphrodite, Bruno, Citronella, Titan, Lady Byng, Mrs. Marion Cran and Cardinal were introduced at \$50 each. Mary Gibson, Sir Michael and Susan Bliss sold for \$40 each. Snow White sold for \$45, Dauntless, Pink Satin, Melchoir, Pluie D'Or, Pioneer and Germaine Perthuis at \$35 each and others at \$10 to \$30 each.

These were actual values, paid by those who "Knew their Iris," because these new creations were superlatively

Santa Barbara

beautiful, and each was a great advance over anything previously created.

These magnificent beauties are just as handsome to-day as they were when the prices kept them out of any but the Millionaire's garden, or the garden of the wealthy connoisseur who could afford to gratify his wishes for the best. Fortunately, after propagating them for a few years, I am able to offer these magnificent creations to-day at prices that are "within the reach of everybody."

I have invested a comfortable fortune in rare importations and new introductions. The plants I will send to you will be just as large and will produce just as beautiful flowers as the originals, for which I paid fabulous prices. They will be identical in every way to the original stock, which cost me a small fortune.

This collection contains several of the famous Dykes Medal Winners. Only one Iris each year can receive this Award, the World's Highest Honor, in England, France and America. Winners of other Medals and Awards are included.

I hope this unusual offering will enable you to add at least a part of this marvelous group of Iris to your garden.

For landscape effect, or for specimen clumps they cannot be equalled, excepting by the Japanese Peonies, which are somewhat similar and equally attractive. They stand heat and rain and have a
